3. Installation

• Desktop installation

• Rack-mount Installation

4. Login WEB UI

For more L2 management functions, please login the Web-Based UI as the following steps:

Step 1. Find the IP address of the switch.

- The default login IP address of this series switch is 192.168.0.1, with a subnet mask of 255.255.255.0.

- If the switch receives an IP address from a DHCP server in your network. You can find this IP address on the DHCP server.

Step 2. Configure the IP address on your PC to make sure the switch and PC are in the same subnet.

- If the switch uses the static IP address of 192.168.0.1, configure your PC's IP address as 192.168.0.x ("x" ranges from 2 to 254), and subnet mask as 255.255.255.0.

- If the switch uses an IP address assigned by a DHCP server, set your PC to obtain an IP address automatically from the DHCP server.

Step 3. Launch a web browser on your PC. Enter the IP address of the switch in the address bar and fill in the username and password.

- The default login username and password are both "admin".
