6Kv Surge Immunity

Industrial PoE Switch

Super Quality, Standard Design, Stable Operation, Simplified Management

WI-PCMS554F-L3

Wi-Tek L3 managed Cloud PoE Switch supports diverse management methods such as **Web** management, **CLI** and remote **Cloud** management which is a highly efficient way for users to manage the network **anywhere** and **anytime**. Besides, they also support intelligent deployment, automatic configuration of networking, abnormal alarms and other functions, bringing more convenience to the maintenance personnel. As **layer 3** Cloud Switch, it not only supports **static routing**, **RIP**, and **OSPF**, but also provides complete **security** policies, **QoS** policies, and diversified **VLAN** functions.

6 10G SFP+ Slots	48 Gigabit Ethernet PoE Ports	
Cloud Management	10G High-Speed Uplink Interface	Routing Protocol
12M Large Buffer Memory	Flexible QoS	Up to 30W PoE

10G Uplink L3 Managed Switch with 48 Gigabit PoE ports

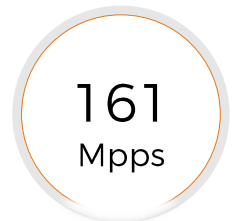

Wi-Tek L3 managed Cloud PoE Switch provides serious performance:

PoE Power

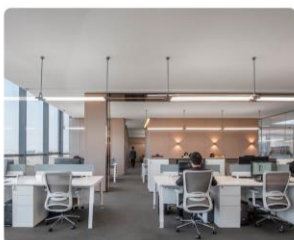

Switching Capacity

Packet Forwarding Rate

● Typical Scenario

Enterprises

Hotel

Shopping Mall

Super Market

WI-AP417P

The wireless **in-wall AP** supports **Cloud** management functions. Users can **quickly** complete network-wide device deployment, configuration, **remote** management, and operation and maintenance, greatly **reducing** equipment costs, labor costs, and time costs for wireless network construction.

 Cloud Management	 PoE Input and Output	 Multiple SSID
 Fast Roaming	 802.11 AC Wave2	 IPTV
 Full Gigabit Ethernet Ports	 Fit-Fat Switch	 MU-MIMO

Wi-Fi 5 1300Mbps
Gigabit Wall-plate
Wireless Access Point

● Typical Scenario

Adopting an **86-type** wall mount junction design, the AP can perfectly blend into existing decoration without any damage.

WI-AX1800M V2

The router supports the next-generation **Wi-Fi 6** standard at 2.4 GHz and 5 GHz. The maximum wireless rate is 574Mbps at 2.4 GHz, the maximum wireless rate is 1201Mbps at 5 GHz, and the concurrent rate can reach 1775Mbps. The recommended number of connected wireless terminals is **100** which is **50%** more than that supported by **Wi-Fi 5**.

 Cloud Management	 Wireless Speed Up to 1800Mbps	 Mesh Network
 Fast Roaming	 One Click Mesh	 Parental Control
 Guest Network	 Built-In Firewall	 WPA3

1800M Gigabit Dual-Band Wi-Fi 6 Wireless Mesh Router

● Typical Scenario

WI-AX1800M is a gigabit **dual-band** mesh Wi-Fi 6 wireless router, suitable for **large apartments, duplex apartments, villas**, small and medium-sized shops, and other scenarios. In addition, multiple routers can be **quickly** connected **without cables** or **configuration**, which solves the configuration challenges of multi-device networking and adding new devices.
